## 5<sup>TH</sup> & 6<sup>TH</sup> November 2022

# Wader Conservation World Watch

## INFORMATION PACK

# Welcome to the WCWW information pack for 2022.

Once again WCWW will take place to celebrate the anniversary of Wader Quest's first day in the field in, November 2012.

Each year we ask people to join our world wader watch to show their awareness of the problems the world's waders are facing. At the same time they will be acknowledging the effort put in by waderologists, both professional and volunteer alike across the planet, who are dedicating their time and talents to helping reduce some of the effects we, as humans, are having on these wonderful birds. Remember: Caring is the first step to conservation.

We have deliberately kept the concept simple:

- Go out and **look for waders**, or **shorebirds** if you prefer.
- **Make a note** of what you see (count them if you wish).
- Either: **share** your [eBird](#) list from those days with our **WaderQuestTeam** account
- Or: send an **email** to [wcww@waderquest.net](mailto:wcww@waderquest.net) telling us what you saw, where, and with whom; feel free to send any photos you have taken of the birds or your friends with your sightings too.

Don't forget, if you wish you can also submit your lists to [BirdTrack](#) and your local bird recorders to make your efforts even more valuable. If Birding in Brazil, why not add your photos to [wikiaves](#), a fantastic collection of bird images of Brazilian birds.

If you are part of a group of local birders why not get your friends involved? If you are part of an organisation, be it a bird club, or business please feel free to send along a logo to add to the panel of participating organisations on the website, and in the resulting newsletter.

**For our part we will:**

- Collect and collate all the wader/shorebird sightings from around the world.
- Create a collective world list of species seen.
- Create a Roll of Honour naming all the participants for which names are provided, or numbers of participants where names have not been supplied.
- Create a *Newsletter Special* with all the results and some reports from contributors, a map of the locations and as many photos as we can include from contributors the world over.

The definition of what constitutes a wader differs from place to place. So, just to clarify here is a list of the birds we are hoping to hear about:

**We did exceptionally well last year and if  
everyone recruited one more observer,  
we'd do twice as well!**

**Let's make a noise for waders around the world, give  
them a voice by standing up to say 'I CARE!'**

**Remember:**

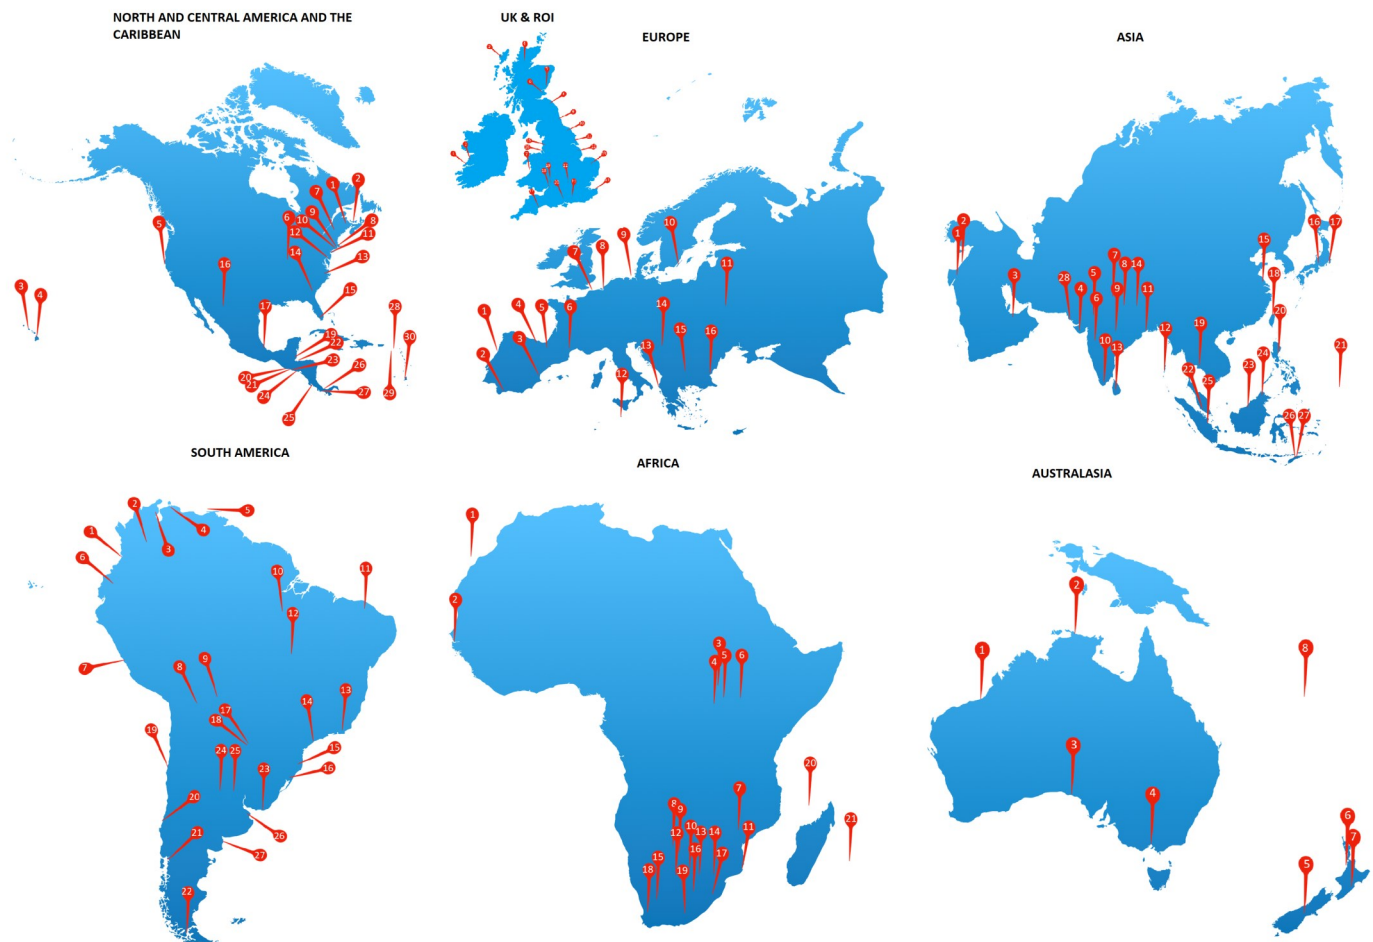

**Caring is the first step to conservation.**
